

DRIVE THE CORONA AWAY

With COVID at large and Boris in charge
We're all in a bit of a state
With hands face and space, and test track and trace
We've got quite a lot on our plate
To banish the gloom we party on Zoom
We sing and we clap and we play
We stay in good heart two metres apart
and drive the Corona away

When we're up the creek whose help do we seek
We've had it with Boris's bluff
We need those au fait with m-RNA
to do all the sciencey stuff
They work in the lab and make us a jab
to keep the bad bugs at bay
A shot in the arm will work like a charm
to drive the Corona away

This time of the year there's hope in the air
as friends outdoors we can greet
We swim in the sea or gather for tea
In parks and gardens we meet
We still stay aware and mingle with care
We cherish each fresh new day
Together we sing to welcome the spring
and drive the Corona away.

Now some may abhor John Lewis décor
according to one chatty rat
We're getting depressed so give us a rest
from curtains in Boris's flat
We've had the vaccine and we really mean
to meet and make merry and play
So cheerfully let's go sing at Annette's
and drive the Corona away

Now Dominic's back from getting the sack
to stick it to Boris and Matt
Though he did the most to put them in post
but let us not dwell upon that
We're doing our best at not getting stressed
when all they have left to say
is Mister Hancock will work round the clock
to drive the Corona away

Now Matt's in a fix because of some pics
Recorded on C C T V
It's hard not to flinch when viewing the clinch
A sight no-one wishes to see
Soon there'll be no trace of Matt's little face
On news channels every day
They've brought back the Saj and put him in charge
to drive the Corona away

And now freedom day is coming our way
The rules and the regs will be tossed
They're Boris's plans, our fate's in his hands
so better keep all digits crossed
Whatever transpires we'll still have our choir
so let's make the most of today
We'll stay in good cheer and go for a beer
to drive the Corona away

Though times have been tough and we've had enough
For Boris it wasn't all bad
There may have been do's with bring your own booze
But never a party was had
It's now the New Year and Omicron's here
But boosted and jabbed we say
Let's all take a sup of our Wassail cup
And drive the Corona away.
